

MYLAPS FLEX Manager 1.1.3

Release Notes & Instructions

Introduction and reasons for update

MYLAPS is continuously working to improve its products and ensure the highest quality. To make sure that all systems operate correctly, regular software- and firmware updates are required.

Hotfix

The FLEX Manager 1.1.3 release contains the following hotfix:

- Updated the telephone number for SMS activation.

Known Issues

We're always working to resolve issues. If your issue is listed below, we're aware of it and are working to fix it as soon as possible.

- Incidentally the activation process fails, displaying the message: "Activation Failed". If this happens please repeat the activation procedure.

Upgrade instructions

Follow the instructions below to upgrade the FLEX Manager:

- Run FLEX Manager. If there is an update available you will be automatically prompted to install the new version.
- If you do not have the FLEX Manager, download it from the FLEX website: <http://flex.mylaps.com> and follow the on-screen installation instructions.
