

## FLEX PRODUCTS POLICY

MYLAPS Transponders come with a subscription for 1, 2 or 5 years. When the subscription ends, you can renew it with another period: choose the subscription that fits your racing career best. If you choose **not** to renew your subscription, the transponder will cease to operate.

After purchasing your transponder or following subscription, you need to active it by using the FLEX Manager software. To download this go to <http://www.mylaps.com/en/software-firmware> and follow the instructions on the website. Please note, that the FLEX Manager software is only compatible with Windows systems.

For help with your device or with the registration of your transponder online? Please check our support page <http://www.mylaps.com/en/support>

For other questions or support, please e-mail your regional office.
