# ProChip FLEX

1 Activate

Before you are able to use your ProChip FLEX, you will have to do a one-time activation. Plug the ProChip FLEX into your computer by using the USB connection. Download the free ProChip FLEX Manager software at flex.mylaps.com and follow the instructions from the inside of this manual.

Now, it is easy to check your ProChip's battery status, see how long your current subscription lasts and renew your subscription by plugging your ProChip FLEX into your computer's USB port.

2 Register

Register your ProChip FLEX to your free online account at mylaps.com to view, analyze and share all your practice and race results online. If the track has a MYLAPS system installed which is online, your results will automatically become visible in your account.

3 Mounting

The ProChip FLEX can be used with the provided ankle straps, or with the MYLAPS ProChip FLEX bicycle holder, which is available in our web shop at mylaps.com.

4 Subscription

Your ProChip FLEX comes with a subscription that is valid for 1, 2 or 5 years. This period starts as soon as you activate your chip with ProChip Flex Manager. It can be extended with another 1, 2 or 5 years when it has expired. Additional subscriptions can be bought at mylaps.com. With an activated subscription, your ProChip FLEX is covered by insurance and warranty.

Warning: If the chip is attached to the bicycle, please make sure it is done properly. An improperly mounted MYLAPS ProChip can be dangerous and can cause serious accidents. MYLAPS cannot be held responsible for any injuries or accidents caused by improper mounted ProChips. Please verify the correct chip mounting position for every race with the organization.
